

The Medical Transitions Clinic (MTC) provides timely access to care for adults with urgent, complex medical issues.

The MTC strives to deliver high quality patient-centred care while reducing Emergency department (ED) admissions, decrease hospital length of stay, and decrease readmissions to hospital.

WHO CAN REFER? Credentialed Professional Staff and Hospital Nurse Practitioners can refer if the following criteria is met:

- Patients 18 years of age or older with acute medical issues
- MUST present in the ED or be admitted to hospital
- Patients whose hospital length of stay can be reduced by follow up in the clinic
- Patients currently admitted who require Internal Medicine follow up, additional tests or treatment
- Patients with a history of repeat admissions and frequent ED visits where outpatient follow up might prevent return to hospital

**Thunder Bay Regional
