**RE: Interim Leadership of Prevention & Screening Clinical Services**

---

Further to the announced retirement of Cathy Paroschy Harris, Director of Prevention & Screening Clinical Services, I am pleased to share that Andrea Docherty, Director, Regional Cancer Program, will provide interim leadership to the Prevention & Screening portfolio.

I appreciate your support of Andrea as she assumes this interim role, and take this opportunity to thank her for her dedication and assistance.

The vacancy of any leadership position provides an opportunity to review and reevaluate our current organizational structure for effectiveness and efficiency. Rather than simply replace a position, we have a responsibility to consider potential improvements and adjustments that best align with our goals and to ensure we are being responsive to the needs of the population of Northwestern Ontario. This concept will apply to all vacant leadership positions going forward.

Thank you for your ongoing support.
