Stroke in Young Adults: Patient Reported Outcomes and Psychosocial Needs

May 5th 2021 0800-0900h

Objectives: Upon completion, participants will be able to:

1. Identify the current gaps in supporting the needs of young persons with stroke based on available literature
2. Describe the PROMs and psychosocial needs of young persons with stroke through lived-experience
3. Reflect on next steps to address identified gaps to support the needs of young persons with stroke
