Environment, Sustainable Health and Mining

How our people, place, and industry impact our environment and health

Our region is vast with a unique geography that creates equally unique connections to the land and the environment. Our economy has also been driven by the land and what's beneath the surface. With these connections it is important to study different connections between our environment and its relationship with our health.

Tuesday, June 8

8:00am – 9:00 am
