RE: Announcement – New Biochemistry Coordinator, Jim Uliana, effective September 2, 2021

Please join me in welcoming Jim Uliana, our new Biochemistry Coordinator beginning September 2nd, 2021.

Jim became a licensed Medical Laboratory Technologist in 1986, graduating from the Thunder Bay Institute of Medical Technology, subsequently obtaining his BA at Lakehead University.

Jim worked at a small regional hospital for 19 years as well as at our large acute care facility since 2006. This vast background has been honed over Jim's 34-year career which has included working in a variety of laboratory disciplines, as well as in the Information Systems department as a Laboratory Information Systems (LIS) programming specialist.

This unique work experience coupled with Jim's expertise and professionalism will aid in the delivery of laboratory services via the Biochemistry section to clients and patients of Northwestern Ontario. Congratulations to Jim!

Georgia Carr
