

UPDATE:

Code Green (EMER-90)

Code Green: Response process activated if a potential or actual evacuation is required in the Hospital (980 Oliver Rd).

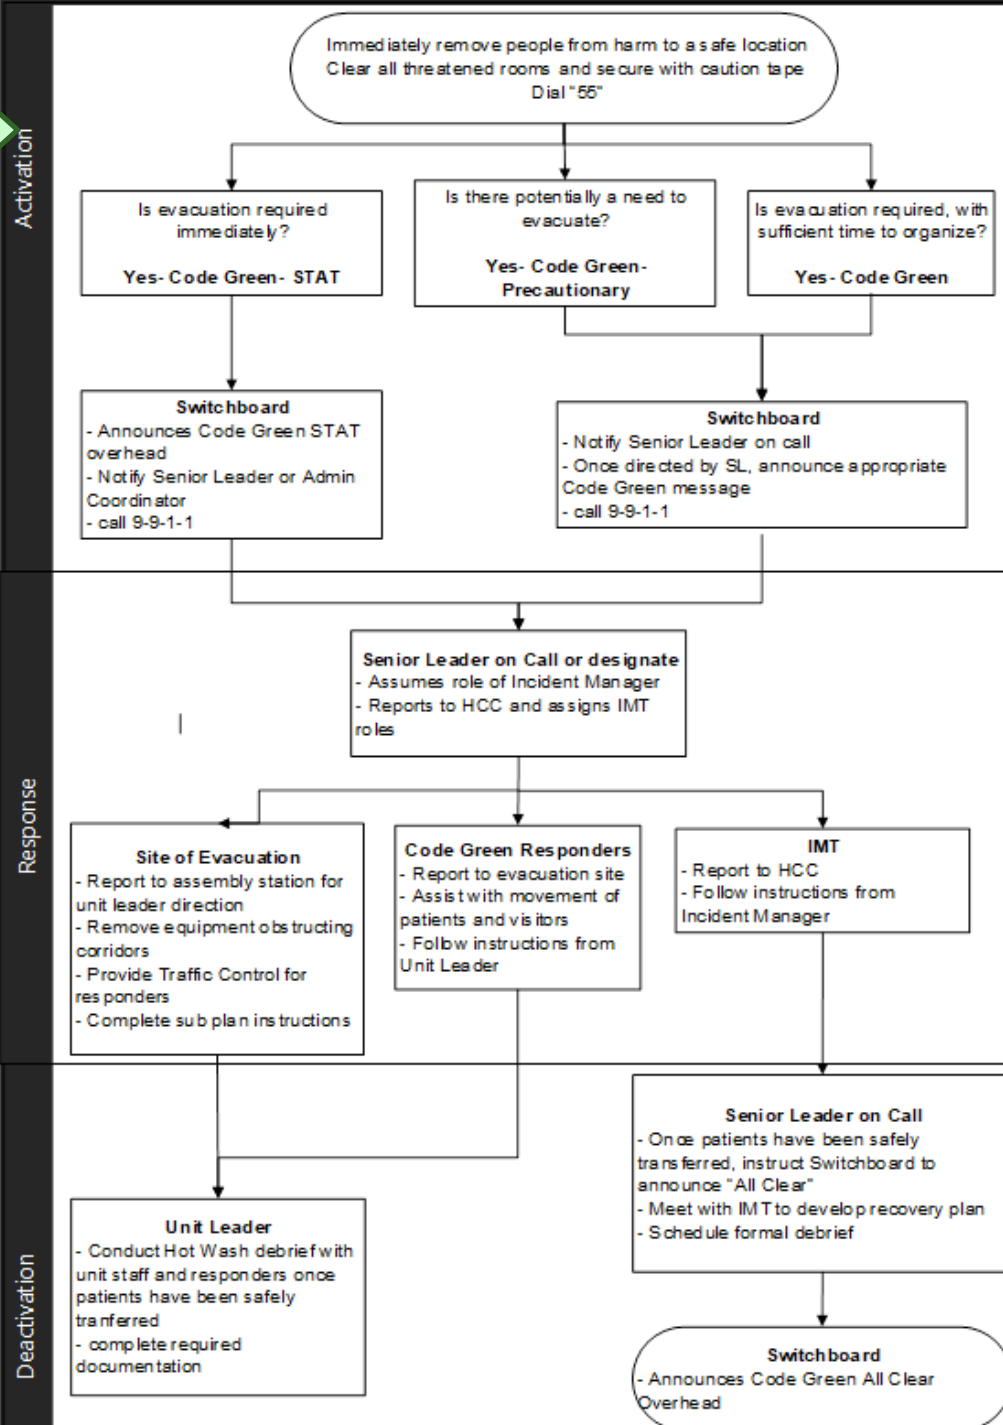

Enhanced Code Green Process Chart

Reminder:
Some Hospital departments have a **Sister Unit** in an External Building to help communicate emergency details and provide support as needed.
(see Code Green Sub Plan)

Hospital-wide drill required annually.
Next drill takes place
Sept. 22, 2022!

Code Green Process Chart

Key Changes Include:
SBAR Evaluation & Hot Wash Debrief

Situation	<ul style="list-style-type: none"> - Hazard triggering need for evacuation - Onset time? - Potential impact to safety or equipment?
Background	<ul style="list-style-type: none"> - How many patients need to be evacuated? - Special concerns, medication, or equipment needs for patients? - How many staff working? - What departments would be impacted?
Assessment	<ul style="list-style-type: none"> - Should fan-out be activated? - What specialties may be involved? - Anticipated evacuation holding area?
Recommendation	<ul style="list-style-type: none"> - Code Green Precautionary - Code Green Partial - Code Green Full evacuation

Manager in the area of evacuation or **Administrative Coordinator** is responsible to complete the SBAR evaluation (as seen above). This information will be provided to the Senior Leader on call.

Immediately after the incident it is the responsibility of the **Department Manager, or designate to lead a Hot Wash Debrief** (see Appendix 7 for Hot Wash Debrief Form). The intent is to document initial worker reactions and feedback to allow for potential improvements to policies and procedures.
