RE: Announcement – Coordinator, Critical Care and Respiratory Services

---

I am very pleased to announce the appointment of Bruno Tassone as the Coordinator, Critical Care and Respiratory Services, effective February 13, 2023.

Reporting to the Critical Care Services manager, Bruno will be responsible for the establishment and implementation of Critical Care and Respiratory Services operational priorities that promote the efficient delivery of quality patient care.

Bruno is well known to the staff and professional staff at TBRHSC. For the past seven years, Bruno has been an Interprofessional Educator (IPE) where he has had the opportunity to be involved with many initiatives, such as the opening of the Ibn Sina Simulation Centre and the development and implementation of the COVID-19 pandemic response related education.

Within our organization, prior to his role as an IPE, Bruno was a staff respiratory therapist, professional practice lead for the Respiratory Services, and for two years the acting coordinator.

Please join me in congratulating Bruno and wishing him well in his new role.
