RE: Announcement: Manager, Capital & Program Development – Casey Ladouceur

---

I am pleased to announce the appointment of Casey Ladouceur as the Manager, Capital & Program Development effective December 18, 2023.

Reporting to myself, Casey will be responsible for overseeing the operation of the Capital & Program Development department.

Casey is a licensed Professional Engineer and holds a Masters of Business Administration degree. Casey brings to the department great knowledge and leadership with 14 years of expertise in organizing business operations, contract management, financial oversight, resource management, and project operations. Prior to joining Thunder Bay Regional Health Sciences Centre, Casey worked at ERCO Worldwide as the Safety, Environmental, and Technical Manager and at True Grit Consulting Limited as an Air/Noise Specialist. Casey's focus on team coordination, communication, collaboration, and problem solving will be an asset to our team.

I'd also like to extend my gratitude and thank Darin Pretto for stepping up to support the department by providing coverage for this role during the interim period. His dedication to patient and family centered care and commitment to the hospital ensured smooth operation for the team. We are sincerely thankful for your efforts. Darin will return to the Maintenance department where he will continue to support TBRHSC.

Please join me in welcoming Casey to the TBRHSC team and thanking Darin!
