Re: Reprint Chart Labels in Meditech

At present, there is a function in Meditech to print/reprint patient chart labels. This is duplicated on both the Admissions desktop, Community Wide desktop, as well as the Order Entry desktop.

In order to avoid duplication, this function will be removed from all Order Entry and Community Wide desktops as of January 11, 2024.

The function to print chart labels will remain on the Admissions desktop.

Please share with staff, and email the help desk if you have any questions or concerns.
