WOUND CARE

Intranet Resources:

- Quick Reference Sheets (links are located at the bottom of the Intranet main page)
- Wound Care Management (PAT-5-172)
- Wound Culture – Obtaining Specimen (PAT-5-144)
- Trauma Burn Guidelines (TR-02)
- Frostbite Protocol (PCS-DO-260)

Wound Care Education

Want to join the Wound Care team, but don't have the education? Don't worry! Commit to completing one or more of the following courses and you can apply to become a Wound Care Nurse:

- International Interprofessional Wound Care Course (IIWCC)
- Nurses Specialized in Wound, Ostomy, and Continence (NSWOC)
- Master of Clinical Science - Wound Healing
- Master of Science in Community Health - Wound Prevention and Care

The Wound Canada Institute also has great resources to help improve your general wound care knowledge.

Key Takeaways:

We must focus on the whole patient and not the hole in the patient when providing wound care.

Dressing selection is important but it is only a small component of holistic wound management.

In-hospital assistance for wound, ostomy, and continence care:

- Emily Behse (ext. 6900)
- Sarah Myllyaho (ext. 6370)
- Shelley Tees (ext. 6255)
- Elli Paul or Kristen Backx (ext. 6073)
- Pager: 624-4971
