

Your input is important

Patient Care Communication Cards

The Thunder Bay Regional Health Sciences Foundation has awarded a Family CARE Grant for the design and production of Care Communication Cards, a simple tool for communicating basic care needs with patients who are non-verbal or do not speak English as their first language. As the front line staff most familiar with these situations, your input is important.

**Please take a quick
survey and let us
know your thoughts.**

The poll will be open until April 9th, 2024 and feedback will also be gathered from the Patient Family Advisor Council. For any questions, please reach out to Terry Fodě, Patient Safety Improvement Specialist at terry.fode@tbh.net or extension **6754**.
