RE: **TBRHSC Active Studies List**

---

Please be advised that the TBRHSC Active Studies List is now available for viewing or download on the [Clinical Research Services iNtranet page](#) under the “Active Studies List” tab. The Active Studies List includes basic information on all currently active research involving human participants taking place under the auspices of TBRHSC and/or TBRHRI (i.e. involving patients, staff, data, space, resources). All listed studies:

- have current valid Research Ethics Board (REB) approval from either the TBRHSC REB, a designated REB of Record through Clinical Trials Ontario, or Lakehead University through our organizations’ reciprocity agreement
- have been issued Institutional Approval by the TBRHSC VP Research
- are actively collecting data or in the follow-up phase

The list is compiled by the Research Ethics & Authorization Office and will be updated quarterly. Reach out to Statton Eade, Research Ethics & Authorization Coordinator, at [Statton.Eade@tbh.net](mailto:Statton.Eade@tbh.net) or (807) 684-6359 if you have any questions.
