Cardiovascular Surgery Program

Frequently Asked Questions

Construction is expected to take three years.

What is the Cardiovascular Surgery Program?
To improve patient care for the region, Thunder Bay Regional Health Sciences Centre (TBRHSC) has been working with the Peter Munk Cardiac Centre (PMCC) at the University Health Network (UHN) to co-develop a cardiovascular surgery (CVS) program at TBRHSC since 2013. We are in an exciting stage of the project, where **76,000 square feet** of space will be renovated and expanded to accommodate a new comprehensive Cardiovascular Surgery Program that will allow our Hospital to complete vital cardiac procedures, reduce wait times for urgent and elective procedures and ensure timely access to essential services in the region.

This transformative project will include

- 14** Cardiovascular Surgery inpatient beds
- 6** New Coronary Care Unit beds
- 1** New Hybrid Operating Room

Renovations to Operating Rooms 9 & 10	A new Ambulatory Cardiovascular Care clinic and Pre-admission Clinic expansion	Renovations to Medical Devices Reprocessing and Biomedical departments
---------------------------------------	--	--

Exceptional **care** for every patient, every time.
