Free webinar. No registration required.

Centre for  
Health Care Ethics

SUSTAINABLE  
DEVELOPMENT GOALS

# CONFRONTING RACISM IN HEALTH CARE

- Explain why racism in health care constitutes an ethical failure.
- Describe how structural and implicit bias influence clinical decision-making, patient outcomes, and provider experiences.
- Distinguish between race as a social construct and racism as a determinant of health.
- Identify system-level strategies that move beyond awareness toward measurable accountability and equity.
- Apply practical approaches to embed anti-racism into clinical practice, education, and leadership.
